# Simplify Your Security with Mimecast
*Tackle Email and Web Complexity Without Sacrificing Security Efficacy*

## Security Simplified

Small to medium businesses face many of the same cybersecurity threats as larger organizations but are at a disadvantage when it comes to defending against them. From limited resources to budget constraints and skills gaps, SMBs must constantly balance security concerns with the need to support a broad range of requirements. They need the best, most affordable security they can get, delivered in the simplest way possible.

Email is the number one attack vector, but it's not the only piece of the cybersecurity puzzle. Your employees may browse online, access and share confidential data, and likely use file-sharing services or other unsanctioned applications. Are you measuring their level of cybersecurity awareness? It's no surprise that human error is a factor in more than 90% of successful breaches.

**Multi-vector attacks, phishing, BEC, insider threats, and brand impersonation require a pervasive security strategy.**

### Take the Guesswork Out of Security

- Trusted by 39,000+ organizations, including 20,000+ using Microsoft 365

- Comprehensive coverage with a fully integrated, cloud-based suite

- Blended detection via signatures, static-file analysis, and machine learning algorithms

- Simplified administration console

- Enterprise-grade security at a price you can afford

- Rapid deployment and regular, automatic upgrades

**Block Ransomware**

**Stop Business Email Compromise**

**Prevent Data Loss**

**End Supply Chain Impersonation Attacks**

**Eliminate Brand Exploitation**

> ## "Mimecast has provided an increased feeling of 'being in control,' more end-user awareness and less effort and cost spent on fixing damage caused by malicious e-mail content."

## Email Security 3.0 Plans
### Plans for organizations with more than 100 employees

Our flexible, affordable subscription plans are designed to meet you where you are today and evolve along with you as your business grows. There is no 'light' version of Mimecast protection. Small customers get the same level of security efficacy and SLAs as enterprise organizations.

### Perimeter Defense

- Secure Email Gateway
- Targeted Threat Protection

**Key Benefits:**

- ✓ Safeguards your organization against the #1 attack channel
- ✓ Prevents financial loss and the exposure of sensitive or proprietary information
- ✓ Reduces complexity and administrator time

### Comprehensive Defense

- ALL PERIMETER DEFENSE FEATURES
- Internal Email Protect
- Awareness Training

**Key Benefits:**

- ✓ Adds protection for inside your network and organization
- ✓ Prevents the lateral and external spread of threats
- ✓ Makes end-users security assets, not liabilities
- ✓ Reduces cyber risk with targeted training for the employees who need it most

### Pervasive Defense

- ALL COMPREHENSIVE DEFENSE FEATURES
- DMARC Analyzer
- Brand Exploit Protect

**Key Benefits:**

- ✓ Extends protection beyond the perimeter
- ✓ Stops attackers from destroying your brand
- ✓ Constantly scans for website and domain impersonation
- ✓ Rapidly takes down web sites mimicking your brand
- ✓ Leverages DMARC standard to safeguard emails from your legitimate domains

> **"With Mimecast, we have a more distributed awareness of email security and safe practices, lower IT staff involvement to deal with malicious emails and their potential results and easier tracking, and examination of emails as they flow through the Mimecast systems."**
