# Power to the CISO

Cyber Observer is a holistic **cybersecurity management** and **awareness** solution. It continuously measures the cybersecurity status of an organization's security environment by retrieving and analyzing Critical Security Controls (CSCs) from relevant security tools.

Risk Officer

IT Infrastructure Manager

SOC Manager

IT Team Manager

CIO

CISO

C-level Manager

Developed for CISOs, InfoSec and IT managers, Cyber Observer provides extensive cybersecurity understanding for all stakeholders. By connecting to third-party vendor security suites, Cyber Observer provides insights and recommendations to empower effective enterprise cyber defense.

Unlimited Tools

Unlimited Cybersecurity Views

Unlimited Critical Security Controls

Unlimited Users

Empowered with **comprehensive awareness**, you can easily identify weaknesses, reduce mean time to detect, prevent breaches, drive strategic planning, and report to executive stakeholders. These activities continually improve enterprise **security posture** and **maturity**.

"This technology provides great insight into the often-obscure subject of security program performance.
For organizations struggling to understand the value and impact of investing in security technologies, Cyber Observer provides both direct and relevant feedback. The insights it offers can help an organization transition to a truly proactive security program." -- **SC Media**

New Features

Reports:

Automatic reports provide real-time information on the status of your organization's cybersecurity tools and overall security posture.

History Database:

History database records raw data, keeps track of changes, and compares posture improvements.
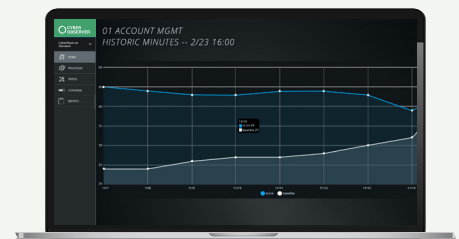

CYBER OBSERVER

Four Layers of Cyber Observer

Organizations fortify themselves with an abundance of security technologies, and then struggle to determine the level of enterprise cybersecurity they achieve. Cyber Observer presents a single-pane-of- glass solution, which displays performance data that proactively provides improvement recommendations in real-time. This view of enterprise-wide cybersecurity allows the organization to deliver the required level of security, meeting requirements for compliance and business risk.

80%

Did you know?

"80% of the problem can be solved by getting the cyber hygiene correct, rather than chasing the latest advanced technology." -- **Wing VC Research Note from RSA 2019**

Tools:

Based on manufacturers' best practices and industry recommendations, Cyber Observer provides internal scoring on your current security tool configurations and presents optimization steps for your tools.

Security Views:

Based on industry-recognized frameworks and Critical Security Controls (CSCs), Cyber Observer assesses in real-time all your security domains and provides improvement recommendations.

Coverage:

Based on a given industry framework, Cyber Observer enhances your security environment by providing an ongoing cybersecurity program, gap analysis, and risk mitigation management.
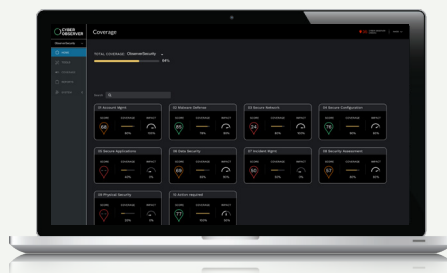

Behavior:

Leveraging real-time monitoring of security tools and domains, Cyber Observer's core engine provides continuous analytics and alerts when your cybersecurity tools detect deviation from normal behavior.
